MACROMOLECULAR STRUCTURE AND SPECIFICITY: COMPUTER-ASSISTED MODELING AND APPLICATIONS[a]

Editors and Conference Organizers
BABU VENKATARAGHAVAN AND RICHARD J. FELDMANN

CONTENTS

Preface. *By* BABU VENKATARAGHAVAN and RICHARD J. FELDMANN vii

Part I. Topology and Architecture of Macromolecules

Deduction of Binding Site Structure from Ligand Binding Data. *By* GORDON M. CRIPPEN 1

Part II. Computer-assisted Macromolecular Structure Generation: Extension of Existing Information

On the Construction of Computer Models of Proteins by the Extension of Crystallographic Structures. *By* RICHARD J. FELDMANN, DAVID H. BING, MICHAEL POTTER, CHARLES MAINHART, BRUCE FURIE, BARBARA C. FURIE, and LYNN H. CAPORALE 12

Protein Structure and Function by Comparative Model Building. *By* JONATHAN GREER 44

Generation of Nucleic Acid Structures and Binding of Molecules to DNA. *By* K. J. MILLER, FREDERICK H. REIN, ERIC R. TAYLOR, and PAUL KOWALCZYK 64

Part III. Molecular Dynamics of Macromolecules

Molecular Dynamics and Minimum Energy Conformations of GnRH and Analogs: A Methodology for Computer-aided Drug Design. *By* R. S. STRUTHERS, J. RIVIER, and A. T. HAGLER 81

Engineering Aspects of Protein Structure. *By* F. R. SALEMME 97

Dynamic Aspects of Protein Structure. *By* MARTIN KARPLUS 107

Part IV. Applications of Macromolecular Specificity to Drug Design

Modeling the Mechanism of Peptide Cleavage by Thermolysin. *By* DAVID G. HANGAUER, PETER GUND, JOSEPH D. ANDOSE, BRUCE L. BUSH, EUGENE M. FLUDER, EUGENE F. MCINTYRE, and GRAHAM M. SMITH 124

[a] The papers in this volume were presented at a conference entitled Macromolecular Structure and Specificity: Computer Assisted Modeling and Applications, which was held by the New York Academy of Sciences on October 12–14, 1983.

Design of Anticancer Drugs Using Modeling Techniques. *By* V. N. BALAJI, J. SCOTT DIXON, D. H. SMITH, R. VENKATARAGHAVAN, and K. C. MURDOCK 140

Structure-Activity Studies: A Three-Dimensional Probe of Receptor Specificity. *By* GARLAND R. MARSHALL 162

Part V. Impact of Computer Hardware and Graphics Technology: Future Perspectives

Calculations of the Three-Dimensional Structures of Proteins. *By* HAROLD A. SCHERAGA 170

A Machine Architecture for Molecular Dynamics: The Systolic Loop. *By* NEIL S. OSTLUND and ROBERT A. WHITESIDE 195

Index of Contributors 209

Papers Presented at the Conference but Not Submitted for Publication:

Part I.

The Relevance of Protein Architecture to the Design of New Proteins. *By* JANE S. RICHARDSON

Conformation and Conformational Change in Proteins. *By* CYRUS CHOTHIA

Part II.

The Use of One- and Two-Dimensional NMR Spectroscopy to Monitor the Consequences of Amino Acid Replacements in Proteins. *By* J. L. MARKLEY, WILLIAM M. WESTLER, WARREN C. BOGARD, JR., MICHAEL LASKOWSKI, JR., XINJIE WU, GILBERTO ORTIZ-POLO, and RICHARD J. FELDMANN

Part V.

The Future of Molecular Computer Graphics or Blinding Speed Is of Little Use without Illuminating Interaction. *By* ROBERT LANGRIDGE

Financial assistance was received from:

- BRISTOL-MYERS COMPANY
- BURROUGHS WELLCOME CO.
- CIBA-GEIGY CORPORATION
- E. I. DU PONT DE NEMOURS & COMPANY
  BIOCHEMICALS DEPARTMENT
  CENTRAL RESEARCH AND DEVELOPMENT DEPARTMENT
- LEDERLE LABORATORIES
- LILLY RESEARCH LABORATORIES
- MERCK SHARP & DOHME RESEARCH LABORATORIES
- NATIONAL INSTITUTES OF HEALTH
- SANDOZ, INC./PHARMACEUTICAL DIVISION, RESEARCH AND DEVELOPMENT
- UNITED STATES ARMY MEDICAL RESEARCH AND DEVELOPMENT COMMAND
- UNITED STATES OFFICE OF NAVAL RESEARCH

The New York Academy of Sciences believes that it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of The Academy. The Academy has no intent to influence legislation by providing such forums.
